

POOL TRANSFORMER

Swimming pool lighting and low voltage transformers specially designed for other equipment, 220 Volt are decreasing in a safe voltage which is determined during the production process, which enables the use of our pool members. Transformer your choice, note that feed primarily by a few volt equipment, and then easily done by comparing the power in watts of power to meet your lighting equipment. For example, employees with 12 volts, each 300 watts 2 to feed your lighting luminaire, however, an optional transformer worth 12 V, you should use one 600 Watt or 2 x 300-watt transformer to accommodate a total of 600 watts of power.

EXPLANATION		POWER Waat	INPUT Volt	OUTPUT Volt
Pool Lighting Transformer		300	220	12
		300	220	34
		400	220	12
DIMENSIONS (mm)	W 200	400	220	24
	L 220	600	220	12
	H 140	600	220	24

Specially designed electric transformers for lighting applications and pool area.

Specially designed electric transformers for lighting applications and pool area-Plastic box type lightning transformer-Moisture and chemical-resistant plastic transformer box.-220 V input. According to the model 300 ~ 600 Watts, 12 ~ 24 V output - Easy installation-Fuse protected-LED operation indicator-High quality.
